

Anti-bovine prion protein mab 1E5

| Catalogue number | Package size |
|------------------|--------------|
| 847-0102000801 | 100 µg |
| 847-0102000803 | 1 mg |

For research use only

| | |
|----------------------|---|
| Product: | monoclonal antibody |
| Clone: | 1E5 |
| Host: | mouse |
| Isotype: | IgG1 _k |
| Immunogen: | recombinant bovine prion protein |
| Specificity: | bovine prion protein aa YEDR |
| Purification: | purified by affinity chromatography |
| Purity: | > 95% by SDS-PAGE |
| Solution: | PBS pH 7.4 without additives |
| Storage: | at -20 °C (repeated thawing and freezing should be avoided) |
| Applications: | ELISA, Western Blot (see figure below) |
| Dilution: | 4 µg/ml in ELISA, 10 µg/ml in Western Blot |
| Reactivity: | bovine and human prion protein, PrP ^{res} |

Figure

Native bovine prion protein from brain (*M. oblongata*) was separated by SDS-PAGE under reducing conditions and blotted on nitrocellulose membrane. NC membrane was incubated by 5 µg/ml of mab 1E5. Bound antibody was detected using horseradish peroxidase conjugated goat anti-mouse IgG/M antibody (ZYMED) and H₂O₂/TMB substrate solution. Mab 1E5 reacted specifically with bands of PrP^c.
